

ALTERNATE ENERGY PURCHASE PROGRAM SIGN-UP

On January 1, 2004, Guthrie County Rural Electric Cooperative Association began to offer a green pricing program to members within any of our rate classifications. This program allows individual members the ability to voluntarily contribute to a fund. All of the money collected from members will be used for the development of alternate energy production facilities in Iowa. Alternate energy production facilities may include wind energy, biomass, solar and other nontraditional generation technologies.

Through this program, members will not be directly purchasing alternate energy, but rather participating in the development of these resources. Contributions may be retained until they reach a sufficient level to pursue a particular development, make a grant to another entity pursuing alternate energy development in Iowa, or arrange for purchases from alternate energy production facilities
